NO INHERITANCE TAXES IN ALABAMA
Forbidden by Constitution of the State

THE FIRST NATIONAL BANK
OF BIRMINGHAM, ALA.

Capital $1,500,000 **Surplus $1,400,000**

Desires to call attention to its new fire and burglar-proof STEEL SAFE DEPOSIT VAULT, which it believes to be the largest and strongest in the South. The vault was built by the Herring-Hall-Marvin Safe Company and is equipped with two Round Doors, and is the finest example of their work. Boxes in this vault can be rented from $5 to $50 per annum, according to size. For the convenience of out-of-town box-holders the Bank will, if desired, RECEIVE SECURITIES AS A SPECIAL DEPOSIT, GIVING ITS SPECIFIC RECEIPT THEREFOR, STATING THE NUMBER OF THE BOX IN WHICH THE SECURITIES ARE LODGED. There are no inheritance taxes in Alabama, as they are prohibited by the Constitution of the State. Correspondence invited.

WILLIAM B. DANA COMPANY, *Publishers*,
FRONT, PINE AND DEPEYSTER STS., NEW YORK

REVIEW OF DECEMBER.

There were some more favorable developments during December which tended still further to revive confidence in financial and trade circles, so that, on the whole, the year closed with the tone rather hopeful. In addition to the distinctly encouraging character of the court announcements of the previous month, there came the report of the Railroad Securities Commission. This was very conservative in its general recommendation, and contained many assuring discussions and convincing arguments destructive of the radical policies of the day, which have found such general support in recent years. The outlook in the iron and steel trades also further improved, while copper rose to a new high point for the year.

In the stock market the recovery established in November was well maintained. Taking a retrospective glance over the last twelve months, it may be a surprise to hear—in view of the many adverse developments against which the market has had to contend—that for the great majority of stocks, closing prices Dec. 31 show no very great changes from opening prices (Jan. 2) at the beginning of the year. This is due in the first place to the fact that there was a tremendous decline in security prices in 1910, so that 1911 started with values at a low level. But it is due in still greater degree to the circumstance that a most determined effort was made on the part of leading financial interests to raise prices to a higher basis in face o the unfavorable developments that kept fast accumulating, month by month. Apparently some bull cliques of limited resources were active during the first six or seven months in boosting special stocks, but had not powerful support been extended by leading financial interests, it would have been impossible to maintain prices so well, and even to advance them, during this period of time. The market encountered many reverses and received numerous severe blows, during which prices tumbled badly, but up to August it was taken firmly in hand again after each break and prices moved up once more. The object, presumably, was to restore confidence in the railroad and financial world, and thereby bring a revival in trade.

In January stock prices evinced an improving tendency. In February business was on a small scale, but with values on the whole firm until the announcement of the decisions of the Inter-State Commerce Commission, denying permission to the railroads, both East and West, to advance rates. Then a tremendous slump occurred. In March there was recovery in a

staggering sort of a way. In April price movements were irregular, though no setback was permitted. During all this time the volume of trading remained small. In May the Supreme Court decisions in the Tobacco and Oil cases were used to stimulate temporary activity and bring about a sharp advance. The latter part of this month there came the cut in steel by the Republic Iron & Steel Co. From that time on iron and steel prices generally began to weaken. Nevertheless a distinct upward turn took place in June notwithstanding that crop conditions were not proving at all satisfactory; a favorable influence was the announcement that the Government had lost its suit to compel the Union Pacific to give up control of the Southern Pacific. The most was made of this news.

In July there was a perfect avalanche of depressing events. The Inter-State Commerce Commission announced a new decision adverse to the railroads in the celebrated Spokane rate cases; torrid weather conditions were doing enormous damage to the crops; numerous new suits against trade combinations were instituted under the Anti-Trust law; special Congressional committees were conducting investigations in sugar and in steel; and a very acute situation developed in Europe concerning the relations between Germany and France and between Germany and England, arising out of the Moroccan controversy. Despite it all, no decline in the stock market was permitted, and closing prices July 31 were actually a trifle higher in most cases than opening prices July 1.

In August, however, further efforts to maintain prices were abandoned. It seemed to be realized that the task was a hopeless one. Support having been withdrawn, the market went all to pieces. Some stocks in this one month lost the whole of the gains established in the preceding twelve months. The next month (September) utter demoralization ensued as a result of the speeches of President Taft and the utterances of Attorney-General Wickersham. In October there was a tendency towards recovery, but the announcement, after the close of business Oct. 26, that the Government had actually brought the suit against the Steel Corporation which it had been rumored for the preceding three months was to be brought, led to a renewed slump in values. That was the end of the decline. From this time on there was a recovery. The feeling now was that all the bad news was out and nothing worse could be in prospect. Then, also, the Attorney-General's attitude in not antagonizing the essential features of the plan for the reorganization of the American Tobacco Co. was considered distinctly encouraging. Certain Court rulings by the new U. S. Commerce Court, restraining several of the orders of the Inter-State Commerce Commission, served further to revive hope, and at the same time increasing activity developed in the iron and steel trades. In the copper trade the improvement was such that a marked rise occurred.

We show below the low and high points for the year and the opening and closing prices for each of a large number of stocks, arranged in groups. In the extended tables given on subsequent pages a range is furnished for every stock and bond in which any transactions occurred during the twelve months. These same tables also show the aggregate of the transactions in each issue for the twelve months—that is, the number of shares of stock or the number of bonds sold during the year.

b Voting trustee certificates stamped extended.
c Par value is $25 per share and price is dollars per share; *not per cent.*
x Ex-dividend.

The volume of business on the Stock Exchange during the year was of relatively small proportions. This will appear when we say that aggregate sales on the rNew York Exchange in the twelve months of 1911 seached only 127,207,258 shares, against 164,150,061 shares for the twelve months of 1910 and 214,632,194 hares for the twelve months of 1909. Furthermore, a few leading stocks contributed the bulk of the year's dealings. In Steel common alone 31,265,108 shares were dealt in; in Union Pacific common the dealings were 16,876,180 shares, and in Reading common they reached 21,900,525 shares, the latter, however, being half shares. Thus, these three stocks account for more than one-half the year s transactions in the whole list. In the following we show the stock and bond shares for the last four years, both for December and the twelve months:

VOLUME OF BUSINESS ON THE STOCK EXCHANGE.

Month of Dec.	1911.	1910.	1909.	1908.

In the money market there was during December a gradual return to the easy conditions that had ruled throughout the year until the latter part of November,

though in the case of time loans and commercial paper a decidedly higher level was maintained. In the call-loan branch the maximum of 6% was again recorded on December 1 but after that rates eased off, with the range December 29 (the last day for Stock Exchange transactions in money) 3½@4%.

RATES FOR MONEY IN NEW YORK; WEEKLY.

Double names—Choice 60 to 90 days	4½-5	4¼-4¾	4¼-4¾	4½-5
Single names—Prime 4 to 6 months	4½-5	4¼-4¾	4¼-4¾	4½-5
Good 4 to 6 months	5½	5	5	5¼-5½

In foreign exchange there was during December, as there had been in most of the other months of the year, more or less irregularity in the course of prices for sterling bills. Early in the month quotations were at the lowest level since the previous August. After the sailing of the French boat "La Provence" on December 21, the last ship that could deliver sight exchange before the new year, a gradual decline in rates occurred. There was some recovery, however, before the close, due to the sentimental influence exerted by the action of the Lancashire Cotton Spinners' & Manufacturers' Association in locking out the workers in all the weaving mills under the control of the Association. This suggested a possible curtailment of cotton shipments from this side. $500,000 gold was shipped to Buenos Ayres early in the month.

CONDITION OF THE TRUST COMPANIES OF NEW YORK STATE.

We present below comparative statements showing the condition of the trust companies of New York State at the date of the last call and of various previous calls since August 1907. We give separately the totals for the Greater New York and those for the whole State. We also add tables to indicate the changes in deposits for all the separate companies in the different boroughs of this city.

NEW YORK STOCK EXCHANGE

MONTHLY AND YEARLY RECORD

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1911. They need no extended introduction, as they are self-explanatory. The tables embrace every security (excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. All quotations in the column headed "*Price about January* 3 1911" were made on that date, except those in italics, which are the nearest in January 1911. The black-faced letters in the column headed "*Interest Period*" indicate in each case the month when the bonds mature.

In accordance with the new rule adopted by the New York Stock Exchange all quotations for interest-paying bonds are at a price to which accrued interest must be added. The exceptions to the rule are income bonds and bonds on which interest is in default. This method of quoting bonds became effective January 2 1909.

☞*For foot-notes to tables see last page of bonds and last page of stocks.*

GENERAL QUOTATIONS
OF
BONDS AND STOCKS.

1. In the following thirty pages of tables, quotations are given for all the more important securities listed on any Stock Exchange in the United States; also for leading unlisted and inactive securities.

2. Quotations from all Stock Exchanges are as near as possible for the *closing day of the month preceding the date of issue.* As the New York Stock Exchange began with Jan. 2 1909 to quote all bond prices "and interest," we have adopted the same method, and no longer employ a designating mark to indicate the fact except where there is a deviation from this rule. The reader will understand, therefore, that unless the letter "*f*" is prefixed to the price, he must pay accrued interest *in addition* to the price. This, however, does not apply to income bonds or bonds in default, in which cases the price includes the interest, should there be any.

3. The letter "*f*" prefixed to bond prices denotes that the quotation is a flat price—that is, that the accrued interest forms part of the price, and therefore the purchaser does not have to provide for it separately in making payment. As already stated in the case of income bonds and bonds in default, the price is always "flat," and no designating mark is employed to indicate the fact.

4. Stock prices marked thus (*d*) are per share. All others are per cent except bank stock prices, which are quoted per share unless otherwise stated.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.: "M" for mortgage, "g" for gold, "g'd" for guaranteed, "end" for endorsed, "cons" for consolidated, "conv" for convertible, "s f" for sinking fund, "l g" for land grant, "op" for optional.

7. The black-faced type in the letters showing the interest period indicates the *month* when the bonds mature.

NOTICE.—All bond prices are now "and interest" except where marked "f" and income and defaulted bonds.

STREET AND ELECTRIC RAILWAYS

In quoting street and electric railway bonds, we employ the same method as in quoting the bonds of steam railroads. The great majority of issues being quoted "and interest," we use no designating mark whatever where that is the case. On the other hand, we prefix the letter "*f*" where there is a deviation from this rule; in such cases the interest forms part of the price. Unless, therefore, "*f*" appears against a quotation, the buyer will understand that the accrued interest is to be added on. This, however, does not apply to income bonds and bonds in default, in which cases the price takes account of the interest and no designating mark is employed.

NOTICE.—All bond prices are now "and interest" except where marked "f," and income and defaulted bonds.

d Price per share, not per cent. *k* Last sale. *n* Nominal. *s* Sale price. *x* Ex-dividend. *y* Ex-rights.

MISCELLANEOUS SECURITIES.

Quotations marked "*f*" indicate that accrued interest is included in the price. Prices not marked are "and interest" that is, purchaser has to pay accrued interest in addition to the price. This, however, does not apply to income bonds and bonds in default, in which cases the price takes account of the interest and no designating mark is employed.

NOTICE.—All bond prices are now "and interest" except where marked "f" and income and defaulted bonds.

STATE AND MUNICIPAL BONDS.

It is not the custom in quoting municipal bonds to include accrued interest in the price given. Hence this accrued interest must in all cases be added on. There are a very few instances which form exceptions to the rule—that is, where the prices given are flat prices, the accrued interest having been taken into account in making them. These are indicated by a special mark, thus (*f*).

The figures in the column "*to net*" indicate the basis on which the securities sell or the interest rate which the securities, if held to maturity, will net to the purchaser at the present market price.

Bonds.	Bid.	Ask.	To Net.

f Flat price. *b* Basis. Stamped 2½% until Dec. 1 1906 *n* Nominal.

BANKS AND TRUST COMPANIES.

Quotations in this department are given per share, not per cent, except for stocks of New York City, Brooklyn and Canadian institutions, and are as near as possible for the *closing day of the month preceding the date of issue*, though often are nominal. An asterisk (*) denotes sales. The letter (*h*) prefixed to a price indicates that the figures show the book value.

Figures of deposits, capital and profits for the national banks are from the Comptroller's last call; for all other institutions they are the latest obtainable, direct returns being procured by us where no periodic statements are required. For the Clearing-House banks of New York, Philadelphia and Boston, deposits are taken from the latest weekly statement.

Where Names are Printed in Italics Fuller Returns may be Found in the Advertising Columns

NO INHERITANCE TAXES IN ALABAMA
Forbidden by Constitution of the State

THE FIRST NATIONAL BANK
OF BIRMINGHAM, ALA.

Capital $1,500,000 **Surplus $1,400,000**

Desires to call attention to its new fire and burglar-proof STEEL SAFE DEPOSIT VAULT, which it believes to be the largest and strongest in the South. The vault was built by the Herring-Hall-Marvin Safe Company and is equipped with two Round Doors, and is the finest example of their work. Boxes in this vault can be rented from $5 to $50 per annum, according to size. For the convenience of out-of-town box-holders the Bank will, if desired, RECEIVE SECURITIES AS A SPECIAL DEPOSIT, GIVING ITS SPECIFIC RECEIPT THEREFOR, STATING THE NUMBER OF THE BOX IN WHICH THE SECURITIES ARE LODGED. There are no inheritance taxes in Alabama, as they are prohibited by the Constitution of the State. Correspondence invited.

REVIEW OF JANUARY.

Developments were not altogether favorable during January, and the month closed with the outlook less promising than at the opening. The Milwaukee & St. Paul on January 25 reduced the dividend on its common stock from a basis of 7% per annum to 5%. This action was not unexpected, but it served to direct attention anew to the unfavorable conditions under which the railroad-carrying industry is being carried on. Some decidedly poor statements of net earnings by prominent Western roads served to give further emphasis to the same point. In the industrial situation generally labor troubles and demands for higher wages counted as untoward incidents. The report of the Steel Corporation for the December quarter of 1911, given out after the close of the Stock Exchange on Jan. 30, made it evident that while the volume of business done might be satisfactory, the low prices realized militated against any but very meagre profits. Nor did the political outlook assume a reassuring aspect, there being much disturbing agitation both in and out of Congress.

After the reduction of the Milwaukee & St. Paul dividend, Chairman Roswell Miller of the company's Board of Directors, on Saturday January 27, gave out a statement saying that the cut in the dividend had been made necessary by the reduction of net earnings caused by the failure of crops in the Dakotas and Minnesota and by the depressed condition of general business. He added that while it seemed reasonable to hope for better crops during the next fiscal year, there was "no prospect of improvement in general conditions, and that in addition to the decreased volume of merchandise and manufactures, there was the continued reduction of rates and the high cost of labor." It was at once recognized that the influences here mentioned as responsible for the ill fortune of the Milwaukee & St. Paul Company were typical of the railroads as a whole in the United States. Many of the monthly returns of earnings for December which came in about the same time proved poor, and served to intensify gloomy feelings. The trunk lines in the territory between Chicago and the seaboard made fairly satisfactory comparisons as a rule and in the South most of the leading systems were able to report substantial increases in both gross and net—the Southern Railway being one of this type, it showing $165,886 gain in gross and $106,334 gain in net. But in the Western half of the country the returns were in most instances strikingly bad. Occasional exceptions to the rule, as in the case of the Northern Pacific, which gained in both gross and net, served merely to bring out in bolder

relief the heavy losses on other roads. The Atchison December statement was first to appear; it showed $403,137 decrease in gross and $208,220 decrease in net. The Colorado & Southern reported $286,661 decrease in gross and $176,345 decrease in net. Then came the Union Pacific statement for the same month, with $172,190 decrease in gross and $630,419 decrease in net; the Southern Pacific with $269,987 loss in gross and $716,595 loss in net, and the Rock Island System with $190,023 loss in gross and $346,762 loss in net. That these poor exhibits were due entirely to conditions peculiar to the United States appeared from the fact that the Canadian roads for the same month recorded noteworthy gains. The Canadian Pacific, for instance, reported an addition of $1,949,587 to gross and of $819,196 to net, and the Canadian Northern $576,000 addition to gross and $144,600 addition to net. It was thus made apparent that in Canada, where the political agitator has not yet gained a foothold, and where no policy antagonistic to the railroads is being pursued, great prosperity and progress and development are being enjoyed; whereas in the United States, where the politicians are engaged in repressing activity and enterprise, the country is experiencing an industrial setback.

Demands for higher wages have caused more or less uneasiness. The Brotherhood of Locomotive Engineers, one of the most conservative labor organizations in the country, addressed communications to the executive heads of the different railroads asking for increases running from 15 to 25%, the percentage varying because of a desire to standardize the wage scale on the different lines. The demands involve all of the railroads east of Chicago and north of the Ohio River and the Norfolk & Western Railway. In view of the losses in earnings and the unsatisfactory rate situation, this demand for higher wages caused much dejection. At the same time operators in the anthracite coal regions were asked to grant higher wages to the miners, while in the Middle Western States miners and operators in the bituminous coal fields were in conference, debating similar demands.

At the textile mills in Lawrence, Mass., a serious labor trouble was precipitated by the going into effect of a new law in Massachusetts fixing 54 hours as the maximum time for a week's labor. It had been the custom in these woolen mills to work 56 hours a week, and when the companies were by statute required to come down to 54 hours, a reduction in wages to the extent of the two hours difference in time was made. But the operatives refused to work on these terms, and, after going on strike, put in a counter demand for an *increase* in wages. The strikers, who are mostly foreigners, would not allow work of any kind to go on at the mills. The disturbances finally became so serious that it was necessary to call out the State militia and scenes of bloodshed and violence were enacted with attendant loss of life.

In the cotton dispute in Lancashire (England) an adjustment was effected. The mill owners, through Sir George Askwith, the Chairman of the Board of Trade's Conciliation Board, suggested a truce of six months. The Lancashire Cotton Spinners' and Manufacturers' Association, it will be remembered, had the previous month declared a lockout of 160,000 cotton weavers because of a strike inaugurated at the Helene mill at Accrington by the union weavers, owing to the refusal of two operatives (a man and his wife) to join the union. Sir Askwith proposed that work should begin forthwith on the understanding that at the end of six months, during which no notices were to be given or strikes begun on the non-unionist question, Sir George would, if asked, submit to both parties suggestions for settling the differences. This proposal was accepted. A prospect loomed up, however, of a labor conflict in Great Britain in a different branch of industry. The coal miners of Wales and Scotland, by the overwhelming vote of 445,801 to 115,921, authorized their leaders to declare a strike on March 1 for a fixed minimum wage. In this case very sanguine hopes are entertained that a compromise will be arranged before the date set for the strike to go into effect.

In Congress the investigation of the Steel Corporation by the Stanley Committee of the House of Representatives continued and many leading witnesses were called to appear before the Committee, including Andrew Carnegie and President Farrell of the Steel Corporation, Louis D. Brandeis, &c. All through the month, also, the Committee on Rules of the House of Representatives gave consideration to a proposal for investigating the so-called Money Trust. Another event was the passage of a bill by the House of Representatives revising the iron and steel schedules of the Payne-Aldrich Tariff Law. This bill was prepared by the Democratic Ways and Means Committee of the House and Chairman Underwood estimated that it would reduce the average tariff on steel imports from 34.51% to 22.42%.

The stock market developed decided weakness towards the close of the month, but manifested considerable firmness at the beginning. In the early part of the month the demand for bonds broadened and, though dealings in share properties were relatively small, prices held steady, with a slight tendency to advance. A few specialties in the railroad market and also in the industrial list evinced decided strength. But transactions in bonds soon began to diminish day by day. At this time also the fire in the building of the Equitable Life Assurance Society, in which were located the vaults of the Mercantile Safe Deposit Company, holding enormous amounts of securities belonging to banking and brokerage houses, served to retard business, inasmuch as this necessitated the postponement of deliveries of securities confined in the safe deposit vaults and rendered inaccessible. A period of extreme dulness and also of sagging prices intervened, to be followed by renewed firmness, occasioned in part by sharp advances in the anthracite coal properties induced by the announcement that the Lehigh Valley Railroad had organized a new company called the Lehigh Valley Coal Sales Company, and had declared an extra dividend of 10% available for the purchase of the stock of this sales company. The Tobacco group of stocks which had been formed with the dissolution of the American Tobacco Company also enjoyed sharp advances and helped to give more or less tone to the whole market. But with the reduction in the dividend on Milwaukee & St. Paul stock, the numerous poor returns of railroad earnings, the continued political agitation and the diminishing profits of the Steel Corporation, growing weakness developed. The quarterly statement of the Steel Corporation was given out after the close of business on January 30. The result of this and the heavy losses in earnings shown by Union Pacific and Southern Pacific was a pretty general tumble in prices on January 31, the steel shares and the Harriman properties being especially weak.

VOLUME OF BUSINESS ON THE STOCK EXCHANGE.

Month of January—	1912.	1911.	1910.	1909.
Stock sales—				
Number of shares	10,906,138	10,416,526	24,538,649	17,275,500

Bond sales (par value)—				
RR. & misc. bonds	$110,566,500	$71,386,500	$82,739,500	$134,866,500
Government bonds	132,000	1,000	44,500	37,000
State bonds	3,135,500	20,116,500	4,038,500	2,858,500
Total bond sales	$113,834,000	$91,504,000	$86,822,500	$137,762,000

In the loan market the situation was one of increasing ease. Money flowed here in enormous amounts from the interior. This was due not merely to the release of funds which had been used in moving the crops but to the inactivity of general trade, which left little need of money for ordinary mercantile purposes. Rates for time loans reflected the redundancy of funds even more distinctly than the call-loan branch of the market. Stock Exchange houses, as a rule, appeared completely to ignore fixed

maturities and confined their borrowings entirely to call loans. As a result, rates for 30 and 60 days fell virtually to the call-loan basis.

RATES FOR MONEY IN NEW YORK, WEEKLY.

	Jan. 5.	Jan. 12.	Jan. 19.	Jan. 26.
Call Loans—				
Stock Exchange—Range for week	2¼-4	2-2¾	1¾-2½	2-2⅜

Single names—Prime 4 to 6 months	4-4½	3¾-4¼	3½-4	3½-4
Good 4 to 6 months	4¾-5	4½-5	4½	4½

Foreign exchange manifested strength and rising prices almost throughout the whole month. The main influence in the advance was the great ease in money rates at this point in contrast with the much higher rates prevailing in Europe. There was decided relaxation in the monetary tension abroad, but nevertheless it was very much more profitable to invest funds abroad than in New York. The Bank of England was obliged to make heavy shipments of gold to India and Egypt, and London was a more or less constant borrower at this centre. Italy also borrowed here and Germany arranged to renew many of the loans which it had obtained here in New York the latter part of 1911 at the time of the monetary pressure in Germany. It was estimated also that American subscriptions to the new German loan offered on January 29 had aggregated between $3,000,000 and $4,000,000 and that there had likewise been subscriptions of about $2,000,000 to the new Austrian loan. There were gold shipments at various times during the month to Costa Rico and to Argentina but no gold was sent direct to Europe, though towards the close of the month such an outflow seemed imminent. In the early part of the month the continuance of the lockout in the cotton trade at Lancashire operated to restrict the supply of cotton bills. Sales here of American securities for foreign account also at times had some influence in stiffening exchange rates. At the very close rates for sterling developed a slight downward reaction.

CONDITION OF THE TRUST COMPANIES OF NEW YORK STATE.

We present below comparative statements showing the condition of the trust companies of New York State at the date of the last call and of various previous calls since August 1907. We give separately the totals for the Greater New York and those for the whole State. We also add tables to indicate the changes in deposits for all the separate companies in the different boroughs of this city.

NEW YORK STOCK EXCHANGE

MONTHLY AND YEARLY RECORD.

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1911. They need no extended introduction, as they are self-explanatory. The tables embrace every security excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. The black-faced letters in the column headed *"Interest Period"* indicate in each case the month when the bonds mature.

In accordance with the new rule adopted by the New York Stock Exchange all quotations for interest-paying bonds are at a price to which accrued interest must be added. The exceptions to the rule are income bonds and bonds on which interest is in default. This method of quoting bonds became effective January 2 1909.

☞*For foot-notes to tables see last page of bonds and last page of stocks.*

BONDS—PRICES AND SALES FOR JANUARY 1912 AND THE YEAR 1911.

GENERAL QUOTATIONS
OF
BONDS AND STOCKS.

1. In the following thirty pages of tables, quotations are given for all the more important securities listed on any Stock Exchange in the United States; also for leading unlisted and inactive securities.

2. Quotations from all Stock Exchanges are as near as possible for the *closing day of the month preceding the date of issue.* As the New York Stock Exchange began with Jan. 2 1909 to quote all bond prices "and interest," we have adopted the same method, and no longer employ a designating mark to indicate the fact except where there is a deviation from this rule. The reader will understand, therefore, that unless the letter "*f*" is prefixed to the price, he must pay accrued interest *in addition* to the price. This, however, does not apply to income bonds or bonds in default, in which cases the price includes the interest, should there be any.

3. The letter "*f*" prefixed to bond prices denotes that the quotation is a flat price—that is, that the accrued interest forms part of the price, and therefore the purchaser does not have to provide for it separately in making payment. As already stated in the case of income bonds and bonds in default, the price is always "flat," and no designating mark is employed to indicate the fact.

4. Stock prices marked thus (*d*) are per share. All others are per cent except bank stock prices, which are quoted per share unless otherwise stated.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.: "M" for mortgage, "g" for gold, "g'd" for guaranteed, "end" for endorsed, "cons" for consolidated, "conv" for convertible, "s f" for sinking fund, "l g" for land grant, "op" for optional.

7. The black-faced type in the letters showing the interest period indicates the *month* when the bonds mature.

NOTICE.—All bond prices are now "and interest" except where marked "f" and income and defaulted bonds.

STREET AND ELECTRIC RAILWAYS

In quoting street and electric railway bonds, we employ the same method as in quoting the bonds of steam railroads. The great majority of issues being quoted "and interest," we use no designating mark whatever where that is the case. On the other hand, we prefix the letter "*f*" where there is a deviation from this rule; in such cases the interest forms part of the price. Unless, therefore, "*f*" appears against a quotation, the buyer will understand that the accrued interest is to be added on. This, however, does not apply to income bonds and bonds in default, in which cases the price takes account of the interest and no designating mark is employed.

NOTICE.—All bond prices are now "and interest" except where marked "f," and income and defaulted bonds.

d Price per share, not per cent. *k* Last sale. *n* Nominal. *s* Sale price. *x* Ex-dividend. *y* Ex-rights.

MISCELLANEOUS SECURITIES.

Quotations marked "*f*" indicate that accrued interest is included in the price. Prices not marked are "and interest" that is, purchaser has to pay accrued interest in addition to the price. This, however, does not apply to income bonds and bonds in default, in which cases the price takes account of the interest and no designating mark is employed.

NOTICE.—All bond prices are now "and interest" except where marked "f" and income and defaulted bonds.

STATE AND MUNICIPAL BONDS.

It is not the custom in quoting municipal bonds to include accrued interest in the price given. Hence this accrued interest must in all cases be added on. There are a very few instances which form exceptions to the rule—that is, where the prices given are flat prices, the accrued interest having been taken into account in making them. These are indicated by a special mark, thus (*f*).

The figures in the column *"to net"* indicate the basis on which the securities sell or the interest rate which the securities, if held to maturity, will net to the purchaser at the present market price.

Bonds	Bid.	Ask.	To Net.

f Flat price. *b* Basis. Stamped 2½% until Dec. 1 1906 *n* Nominal.

BANKS AND TRUST COMPANIES.

Quotations in this department are given per share, not per cent, except for stocks of New York City, Brooklyn and Canadian institutions, and are as near as possible for the *closing day of the month preceding the date of issue*, though often are nominal. An asterisk (*) denotes sales. The letter (*h*) prefixed to a price indicates that the figures show the book value.

Figures of deposits, capital and profits for the national banks are from the Comptroller's last call; for all other institutions they are the latest obtainable, direct returns being procured by us where no periodic statements are required. For the Clearing-House banks of New York, Philadelphia and Boston, deposits are taken from the latest weekly statement.

Where Names are Printed in Italics Fuller Returns may be Found in the Advertising Columns

The First National Bank of Chicago

Invites the Accounts of Banks and Bankers

The record of forty-eight years' consistent, conservative banking; the increase of capital and surplus to $20,000,000 and the growth of deposits to over $123,000,000, together with the service and facilities afforded, make this invitation worthy of careful consideration.

FRONT, PINE AND DEPEYSTER STS., NEW YORK

REVIEW OF FEBRUARY.

Political influences continued dominant, and affairs remained very quiet, both in trade circles and on the Stock Exchange. Perhaps the event of greatest moment, though it had no immediate influence on the situation, was the action of ex-President Roosevelt in announcing that he would accept a nomination for the Presidency at the hands of the Republican Party at this year's quadrennial election. This action of Mr. Roosevelt involved a complete change in his attitude towards the nomination. His previous utterances on the matter had been delphic and more or less vague, but in all that he said and did he distinctly conveyed the impression that under no circumstances would he become an active candidate or do anything to bring about his nomination—that it would be a sacrifice for him to accept, but that nevertheless should he be nominated, he would not refuse to obey "the call of duty."

Gradually, however, Mr. Roosevelt paved the way for the definite announcement that he would accept and also that he would enter the contest and make a fight for the nomination. On Nov. 8 1904 Mr. Roosevelt had declared himself as most emphatically opposed to the idea of a third Presidential term, saying that on the 4th of March then next ensuing he would have served 3½ years, and that this 3½ years would constitute his first term, to which he added: "The wise custom which limits the President to two terms regards the substance and not the form, and under no circumstances will I be a candidate for or accept another nomination." On Dec. 11 1907 he had reaffirmed his attitude in that respect, saying he had not changed and should not change the decision thus announced. In the public discussions of the possibility that he might be induced to run for the office again the present year, the words here quoted were constantly referred to as binding upon him and as precluding his becoming a candidate; but in an editorial article in the "Outlook" for February 17 it was pointed out that his announcement in 1904 was to be interpreted as referring to a third *consecutive* term, and that publication used the following incident for ilustration: "When a man says at breakfast in the morning, 'No, thank you; I will not take any more coffee,' it does not mean that he will not take any more coffee to-morrow morning, or next week, or next month, or next year." The press quickly took up the remark and made it the subject for humorous observations.

The opportunity to make a positive declaration came in a letter addressed to him from Chicago on Feb. 10, to which was attached the names of seven Republican

Governors, namely Herbert S. Hadley of Missouri, W. R. Stubbs of Kansas, Chase S. Osborn of Michigan, Joseph W. Carey of Wyoming, Robert P. Bass of New Hampshire, Chester H. Aldrich of Nebraska and William E. Glasscock of West Virginia. These Republican Governors in their letter declared it their belief that a large majority of the Republican voters of the country favored the nomination of Mr. Roosevelt and that a large majority of the people favored his election as the next President of the United States. They asked that, in view of this public demand, he should announce whether he would accept a nomination if it came to him. They argued that he would be "unresponsive to a plain public duty if he should decline to accept the nomination coming as the voluntary expression of the wishes of a majority of the Republican voters of the United States through the action of their delegates in the next National Convention." Mr. Roosevelt replied to this letter just two weeks later, on Feb. 24. In the meantime, however, he made a speech before the Ohio Constitutional Convention at Columbus. This speech attracted wide attention, because in it he took a step further in the radical policies for which he has long been noted. The address was called "A Charter of Democracy," and he expressly advocated a recall of judicial decisions. The stand he would take in that respect had been foreshadowed in an article in the "Outlook" for Jan. 6 1912, entitled "Judges and Progress." In this article, after speaking of the "festering wrong and injustice" perpetrated "because certain judges, certain courts are steeped in some outworn political or social philosophy," he proposed that in certain classes of cases, after the courts had handed down a decision, the voters should be allowed to determine whether such decision should be affirmed or reversed by popular verdict.

But, though he had indicated his views in this respect in the article referred to, it was hardly supposed that he would go so far as to make these views a cardinal feature of his political dogmas or incorporate them as a plank in the political platform on which he was to stand. But in his speech before the Constitutional Convention he did this very thing. He said he did not believe "in adopting the recall save as a last resort, when it has become clearly evident that no other course will achieve the desired result." He then added: "But there is one kind of recall in which I very earnestly believe, and the immediate adoption of which I urge. When a judge decides a Constitutional question, when he decides what the people as a whole can or cannot do, the people should have the right to recall that decision if they think it wrong. We should hold the judiciary in all respect, but it is both absurd and degrading to make a fetich of a judge or of any one else."

After delivering this address Mr. Roosevelt remarked, in response to a question of the reporters, that his "hat was now in the ring." It soon became apparent that he was to follow his hat, but in the meanwhile his views regarding judicial recall alienated from him many former supporters, who now declared inability to accept this further step in radicalism. On Feb. 24 he sent his letter to the Republican Governors saying he would consent to run, and on Sunday night, Feb. 25, this letter was given to the press. He said in the letter that he realized "to the full the heavy responsibility" put upon him, but would accept the nomination for President if it was tendered to him, and that he would adhere to this decision until the Convention had expressed its preference." He closed with this statement: "One of the chief principles for which I have stood, and for which I now stand, and which I have always endeavored and always shall endeavor to reduce to action, is the genuine rule of the people, and therefore I hope that, so far as possible, the people may be given the chance, through direct primaries, to express their preference as to who shall be the nominee of the Republican Presidential Convention."

No one cared to venture an opinion as to what the outcome of Mr. Roosevelt's action in entering the Presidential field would be. It quickly became manifest, however, that he would be no passive candidate, but would endeavor to get as many of the delegates to the Convention to pledge themselves to him in advance as possible. On Feb. 29 it was announced that Senator Joseph M. Dixon of Montana, after a conference with Mr. Roosevelt, had agreed to accept the chairmanship of the Roosevelt National Campaign Organization.

All this, of course, was a direct challenge to President Taft in his endeavor to secure a re-nomination an a re-election. Mr. Taft on his part in an earlier speech had made it clear that he did not share the views of Mr. Roosevelt regarding the recall of judges or the recall of judicial decisions, and was prepared to take direct issue with him on that question. In speaking before the Republican Club in this city on Lincoln's Birthday, he referred to the extremists as neurotics. Here is the paragraph containing the expression:

"With the effort to make the selection of candidates, the enactment of legislation and the decision of courts to depend on the momentary passions of a people necessarily indifferently informed as to the issues presented, and without the opportunity for time and study and that deliberation that gives security and common sense to the government of the people, such extremists would hurry us into a condition which would find no parallel except in the French Revolution or in that bubbling anarchy that once characterized the South American republics. Such extremists are not progressives—they are political emotionalists or neurotics, who have lost that sense of proportion, that clear and candid consideration of their own weakness as a whole, and that clear perception of the necessity for checks upon hasty popular action, which made our people who fought the Revolution and who drafted the Federal Constitution the greatest self-governing people that the world ever knew."

Mr. Taft's speech also contained the following very striking paragraph regarding the preservation of property rights:

"It has been said, and it is a common platform expression, that it is well to prefer the man above the dollar, as if the preservation of property rights has some other purpose than the assistance to and the uplifting of human rights. Private property was not established in order to gratify love of some material wealth or capital. It was established as an instrumentality in the progress of civilization and the uplifting of man, and it is equality of opportunity that private property promotes by assuring to man the result of his own labor, thrift and self-restraint. When, therefore, the demagogue mounts the platform and announces that he prefers the man above the dollar, he ought to be interrogated as to what he means thereby—whether he is in favor of abolishing the right of the institution of private property and of taking away from the poor man the opportunity to become wealthy by the use of the abilities that God has given him, the cultivation of the virtues with which practice of self-restraint and the exercise of moral courage will fortify him."

There were many other political developments in and out of Congress during the month not entirely of an assuring nature. In addition, there were some labor matters of a more or less threatening character. In Great Britain grave fears were expressed of the ill results to follow from the contemplated strike of the coal miners to become effective on March 1 in accordance with the announcement made in January. Up to the very last moment hopes were entertained that this gigantic strike, involving a million men, would be averted through the intervention of the British Government. In some of the mines, however, large numbers of men began to quit work two or three days before the close of the month, and on Feb. 29 over 800,000 miners and their assistants had actually left their jobs.

The stock market was dull and lifeless, as would be expected under the unfavorable conditions prevailing as set out above. The course of prices was irregular, with leading stocks at one time tending downward and at another time upward, but with the fluctuations, as a rule, confined within a narrow compass. On the whole, however, prices were well maintained. The copper stocks evinced a rising tendency on the strong statistical position of copper. In certain special stocks substantial advances in values were established. Thus, for instance, Southern Railway preferred moved up on the increase in the dividend rate. In Central of New Jersey there was a sensational rise on top of a noteworthy advance in January.

In the foreign exchange market the prominent feature was the large gold exports. In the early part of the month $8,000,000 gold was sent to Paris, all by Lazard Freres; these exports were declared to be entirely the result of special transactions, and rates of exchange would not have justified the movement. Later in the month there were considerable shipments to South America (Buenos Ayres) and there were also some minor exports to Central America.

In the money market continued ease prevailed. Loanable funds were in superabundant supply, and the only effect of the large gold exports and the decline in Clearing-House bank reserves was to cause a fractional advance in the rates for time loans.

CONDITION OF THE TRUST COMPANIES OF NEW YORK STATE.

We present below comparative statements showing the condition of the trust companies of New York State at the date of the last call and of various previous calls since August 1907. We give separately the totals for the Greater New York and those for the whole State. We also add tables to indicate the changes in deposits for all the separate companies in the different boroughs of this city.

NEW YORK STOCK EXCHANGE

MONTHLY AND YEARLY RECORD

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1912. They need no extended introduction, as they are self-explanatory. The tables embrace every security (excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. All quotations in the column headed *"Price about January 2 1912"* were made on that date, except those in italics, which are the nearest in January 1912. The black-faced letters in the column headed *"Interest Period"* indicate in each case the month when the bonds mature.

In accordance with the new rule adopted by the New York Stock Exchange, all quotations for interest-paying bonds are at a price to which accrued interest must be added. The exceptions to the rule are income bonds and bonds on which interest is in default. This method of quoting bonds became effective January 2 1909.

☞*For foot-notes to tables see last page of bonds and last page of stocks.*

GENERAL QUOTATIONS
OF
BONDS AND STOCKS.

1. In the following thirty pages of tables, quotations are given for all the more important securities listed on any Stock Exchange in the United States; also for leading unlisted and inactive securities.

2. Quotations from all Stock Exchanges are as near as possible for the *closing day of the month preceding the date of issue.* As the New York Stock Exchange began with Jan. 2 1909 to quote all bond prices "and interest," we have adopted the same method, and no longer employ a designating mark to indicate the fact except where there is a deviation from this rule. The reader will understand, therefore, that unless the letter "*f*" is prefixed to the price, he must pay accrued interest *in addition* to the price. This, however, does not apply to income bonds or bonds in default, in which cases the price includes the interest, should there be any.

3. The letter "*f*" prefixed to bond prices denotes that the quotation is a flat price—that is, that the accrued interest forms part of the price, and therefore the purchaser does not have to provide for it separately in making payment. As already stated in the case of income bonds and bonds in default, the price is always "flat," and no designating mark is employed to indicate the fact.

4. Stock prices marked thus (*d*) are per share. All others are per cent except bank stock prices, which are quoted per share unless otherwise stated.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.: "M" for mortgage, "g" for gold, "g'd" for guaranteed, "end" for endorsed, "cons" for consolidated, "conv" for convertible, "s f" for sinking fund, "l g" for land grant, "op" for optional.

7. The black-faced type in the letters showing the interest period indicates the *month* when the bonds mature.

NOTICE.—All bond prices are now "and interest" except where marked "f" and income and defaulted bonds.

STREET AND ELECTRIC RAILWAYS

In quoting street and electric railway bonds, we employ the same method as in quoting the bonds of steam railroads. The great majority of issues being quoted "and interest," we use no designating mark whatever where that is the case. On the other hand, we prefix the letter "*f*" where there is a deviation from this rule; in such cases the interest forms part of the price. Unless, therefore, "*f*" appears against a quotation, the buyer will understand that the accrued interest is to be added on. This, however, does not apply to income bonds and bonds in default, in which cases the price takes account of the interest and no designating mark is employed.

NOTICE.—All bond prices are now "and interest" except where marked "f," and income and defaulted bonds.

Bonds.	Bid.	Ask.

d Price per share, not per cent. *k* Last sale. *n* Nominal. *s* Sale price. *x* Ex-dividend. *y* Ex-rights.

MISCELLANEOUS SECURITIES.

Quotations marked "*f*" indicate that accrued interest is included in the price. Prices not marked are "and interest" that is, purchaser has to pay accrued interest in addition to the price. This, however, does not apply to income bonds and bonds in default, in which cases the price takes account of the interest and no designating mark is employed.

NOTICE.—All bond prices are now "and interest" except where marked "f" and income and defaulted bonds.

STATE AND MUNICIPAL BONDS.

It is not the custom in quoting municipal bonds to include accrued interest in the price given. Hence this accrued interest must in all cases be added on. There are a very few instances which form exceptions to the rule—that is, where the prices given are flat prices, the accrued interest having been taken into account in making them. These are indicated by a special mark, thus (*f*).

The figures in the column *"to net"* indicate the basis on which the securities sell or the interest rate which the securities, if held to maturity, will net to the purchaser at the present market price.

f Flat price. *b* Basis. Stamped 2½% until Dec. 1 1906. *n* Nominal.

BANKS AND TRUST COMPANIES.

Quotations in this department are given per share, not per cent, except for stocks of New York City, Brooklyn and Canadian institutions, and are as near as possible for the *closing day of the month preceding the date of issue*, though often are nominal. An asterisk (*) denotes sales. The letter (*h*) prefixed to a price indicates that the figures show the book value.

Figures of deposits, capital and profits for the national banks are from the Comptroller's last call; for all other institutions they are the latest obtainable, direct returns being procured by us where no periodic statements are required. For the Clearing-House banks of New York, Philadelphia and Boston, deposits are taken from the latest weekly statement.

Where Names are Printed in Italics Fuller Returns may be Found in the Advertising Columns

The First National Bank of Chicago

Invites the Accounts of Banks and Bankers

The record of forty-eight years' consistent, conservative banking; the increase of capital and surplus to $20,000,000 and the growth of deposits to over $123,000,000, together with the service and facilities afforded, make this invitation worthy of careful consideration.

REVIEW OF MARCH.

In face of threatening and disturbing features in the labor world and some other drawbacks, the tone in financial circles decidedly improved in March, and this was accompanied on the Stock Exchange by a wholly unexpected rise in prices of large proportions and a growing revival of activity. The speculation on the Stock Exchange was undoubtedly the result of a concerted movement on the part of important interests, but it had for its basis a number of cheering factors suggesting better times in the not remote future. In the iron and steel trade, continued activity was noted, and while prices remained low, they displayed a stiffening tendency, notwithstanding a sharp break in the price of iron ore, last season's quotations at Lake Erie ports being cut 75 cents a ton on Bessemer ores and 65 cents on non-Bessemer. In the copper trade the same encouraging circumstances were noted as for several months past, that is, deliveries ran in excess of production, with the result of a further advance in price. For the first time in several years the price of the metal touched 15 cents a pound, and it continued to advance, with sales of electrolytic at the close of the month to domestic buyers at 15½ cents and in Europe at 15⅝ cents, at which latter figure Lake copper was quoted here. This was a rise of more than a cent a pound during the month.

The prices of some other metals also advanced, lead, for instance, rising from 4.10c. per lb. to 4.30c., while quotations for pig iron moved up 25@50c. per ton. In the dry goods trade, with stocks of goods low, an active demand brought improving prices, and print cloths at Fall River were marked up by successive stages from 3¼c. per yard to 3⅜c., then to 3½c., then to 3⅝c., then to 3¾c. and finally to 3⅞c. In nearly all branches of trade and industry the volume of business was large, notwithstanding the existence of hindrances that are usually found in a Presidential year. There was a concensus of reports that stocks of goods everywhere were low. Then, also, current returns of earnings evinced an improving tendency.

Perhaps, however, the circumstance that did most to bring about a better sentiment was certain developments in connection with the political situation. It became increasingly evident as the month progressed that Mr. Roosevelt's hopes of again becoming a Presidential candidate were to be disappointed. Considerable anxiety had been occasioned the previous month by his announcement that he would accept the nomination if it were tendered to him. So far from there being a spontaneous uprising of the people demanding his nomination, such as he had counted upon, he found it necessary to make a contest to get delegates to the

Republican National Convention, and his efforts nearly everywhere met with defeat, notwithstanding that he entered on an extensive speaking tour.

Even more significant of the trend against him was the deliberate action of representative political bodies in declaring against the latest addition to his radical policies, namely the recall of judicial decisions. On March 14 the Union League Club of the City of New York, by an absolutely unanimous vote, adopted a resolution declaring that the plan of reviewing at the polls the decisions of our highest courts upon Constitutional questions would have the effect of destroying all Constitutional guaranties and of overthrowing our system of Constitutional government. The club made an appeal "to all loyal and patriotic citizens, irrespective of party, to oppose to their utmost these dangerous and revolutionary proposals, which threaten to overthrow in a common ruin both justice and freedom." On the 22d similar action was taken by the Republican Club of this city, the 350 members present, without a dissenting vote, adopting resolutions not only denouncing the proposed judicial recall, but also declaring opposition to a third Presidential term.

These favorable developments relating to matters of such far-reaching importance attracted more attention than did the developments of an unfavorable nature. Yet there have been few occasions when adverse features were so numerous and of such commanding prominence. Chief among these was the strike among the coal miners in the United Kingdom. This continued throughout the whole month. It was estimated that, besides the one million miners directly involved, two million more persons were thrown out of employment because of the inability of the establishments with which they were connected to get the necessary supply of coal.

In this country also important labor controversies were pending. The anthracite coal operators on March 13 rejected the demands of the miners in toto. On March 29 the officials of the United Mine Workers ordered the miners to quit work with the expiration of the old wage contract on April 1 and accordingly about 170,000 hard-coal miners laid down their tools on that date.

There were fears, too, all through the month that a strike would occur at the bituminous mines over the greater part of the United States—that is, in Pennsylvania, Ohio, Indiana, Illinois, Iowa, Kentucky, Oklahoma, Kansas, Missouri and a portion of the Kanawha District of West Virginia. Here, however, an agreement was reached March 29, following conferences between operators and men lasting more than a week. Instead of an advance of 10 cents per ton, as demanded, the compromise provides that there shall be an advance of 5 cents a ton for mining lump coal, of 3 cents a ton for mining all other coal, and an increase of 5.26% for men paid by the day. There will, therefore, be only a short suspension of mining in the bituminous fields so as to allow time for the adoption of the compromise agreement by a referendum vote of the miners.

In New England the cotton and woolen mills found themselves pretty generally compelled to make important advances in wages. At Lawrence, Mass., the strike at the woolen mills of the American Woolen Co. (the largest woolen and worsted manufacturers in the world) was brought to a close by advances in wages running all the way from 5% to 16% and averaging about 7½%. At Fall River and at New Bedford the cotton-mill owners voluntarily offered an advance of 5% in wages, which, however, was refused by the operatives, who made demands ranging all the way from 10% to 17½%. Later Mr. M. C. D. Borden, of the Fall River Iron Works Mills, increased his offer to 10%, which was then accepted. The other cotton mills at Fall River averted trouble by also granting 10% increase, and so did the New Bedford cotton manufacturers. At other points in New England advances ranging from 5 to 10% were conceded at various textile mills, but at one or two points strikes or lockouts occurred, owing to inability to agree upon terms.

The railroads also had an important case for higher pay to deal with. The Eastern trunk lines were called upon to pass on a demand of the locomotive engineers for an advance in pay and for a standardization of wages among the different roads, the latter of which, if granted, would add still further to the expense accounts of the roads. The lines involved number fifty and comprise all the railways lying between Chicago and the Eastern seaboard north of the line of the Norfolk & Western Ry. In denying the request the Conference Committee of the managers of the different roads pointed out that these roads carry about one-half of the passenger and freight traffic of the United States. It was computed that to accede to the demands of the engineers would increase the pay on the roads concerned in the sum of $7,553,792 per annum, or 18.63%. It was also pointed out that it was less than two years since the last adjustment of engineers' wages was made in the Eastern District, which resulted in an annual increase of engineers' pay amounting to $3,923,680, or 10.73%. The managers contend that the reduction of railroad net revenues through constantly increasing expenses of operation has so narrowed the margin which is essential to the solvent existence of many of the roads that further increases in operating cost are to be viewed with grave concern. To illustrate the truth of this statement, figures were furnished showing that, though gross earnings on the 52,000 miles of road involved had increased $18,559,659 in 1911, net earnings were reduced in amount of no less than $27,650,200. Furthermore, though the number of men employed was 8,197 less in 1911 than in 1910, the amount paid out in wages increased $39,416,802. Accordingly, it was declared that "this headlong movement toward financial disaster cannot proceed unchecked." A referendum vote of the engineers is now being taken to decide whether the officials of the Brotherhood of Locomotive Engineers should be authorized to inaugurate a strike in order to enforce the demands of the men.

On the Stock Exchange, as already indicated, a noteworthy speculation for higher prices was inaugurated. A large and general rise was established. No doubt a considerable short interest existed in the leading share properties, which facilitated an upward movement. At all events, hardly any one was prepared for the initiation of a bull movement so early in the year of a Presidential election, especially as the political uncertainties seemed to be more numerous and more pronounced than in previous quadrennial periods. Powerful interests, however, thought the time opportune for an advance. As the upward movement proceeded, it seemed to gain impetus. Unfavorable developments, like the labor involvements here and abroad, were completely ignored, while, on the other hand, much was made of the favorable developments, such as the growing activity in trade circles and the castigation that was being administered to Mr. Roosevelt at the hands of the Republican voters. Sentiment, too, in financial circles gave evidence of a growing spirit of optimism. Altogether, striking advances in values were brought about. The industrial properties were special favorites and scored the largest advances, the copper stocks particularly being prominent in view of the advance of the metal, first to 15 cents and later to 15½ cents. Railroad shares, however, also participated in the upward movement, though in a more moderate way. Liquidation in the stock market seems to have been so thoroughly completed before the movement was

started that little difficulty was encountered in moving up any particular stock 5 or 10 points, or even more.

In foreign exchange, the feature was the export of two additional blocks of gold bars to Paris, aggregating $4,000,000. These gold shipments were not justified by the rates of exchange, but were a special transaction conducted by Lazard Freres, who in February had shipped $8,000,000 to Paris under similar circumstances. Considerable amounts of gold were also exported from week to week to South America. As the British coal miners' strike served to interrupt British trade, not only at home but with abroad, the exchange market remained more or less under the influence of that circumstance. Up to the 18th the tendency of sterling rates was upward, owing to European selling of American securities, to borrowing here of funds on foreign account and to firm discount rates at London and other foreign centres. The latter part of the month sterling declined on lower foreign discounts and on a release of funds, occasioned by a belief that a settlement of the British coal strike was near. The selling of bills against the exports of gold weakened exchange at times during the month.

31		SUNDAY.			

The money market was fractionally higher, both for money on call and for time engagements. Arrangements for the 1st of April settlements doubtless played some part in the firmness, and, besides this, the money holdings and surplus reserves of the Clearing-House banks were heavily reduced.

CONDITION OF THE TRUST COMPANIES OF NEW YORK STATE.

We present below comparative statements showing the condition of the trust companies of New York State at the date of the last call and of various previous calls since August 1907. We give separately the totals for the Greater New York and those for the whole State. We also add tables to indicate the changes in deposits for all the separate companies in the different boroughs of this city.

NEW YORK STOCK EXCHANGE

MONTHLY AND YEARLY RECORD

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1912. They need no extended introduction, as they are self-explanatory. The tables embrace every security (excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. All quotations in the column headed *"Price about January 2 1912"* were made on that date, except those in italics, which are the nearest in January 1912. The black-faced letters in the column headed *"Interest Period"* indicate in each case the month when the bonds mature.

In accordance with the new rule adopted by the New York Stock Exchange, all quotations for interest-paying bonds are at a price to which accrued interest must be added. The exceptions to the rule are income bonds and bonds on which interest is in default. This method of quoting bonds became effective January 2 1909.

☞*For foot-notes to tables see last page of bonds and last page of stocks.*
